 W. W. W. W. W. -  
 Deep Creek

July 15 to 17

In the lake  
 water for some  
 miles - sub.  
 collecting areas  
 etc

Large records  
 OK - sub. and  
 and enough -  
 however

No collecting done

Chick's making  
 in the lake  
 Deep Creek

No objection to my  
calling in - I remember  
that - I say - it is  
known here -  
but little of it remains  
Bill remembers that  
of our  
nothing but  
Blackburn <sup>Chrysothrix</sup> is mostly  
except for the  
parrots

There is a pl. explore  
Hyacinth - Don't know  
if it is - I say - it is  
Kew's name - but  
what about other names  
I know

Forrest has a lot of  
cows. About 15. I will  
at any point in the  
will not allow a place  
contract with him.  
I offered him  
the right to buy  
I was in the house  
will not allow  
On paper I can see

Note - I am not sure  
any more about  
the price. I am not  
sure. No. I am not sure  
in the price. I am not  
sure. I am not sure  
I am not sure. I am not

Field Trip Oct 5<sup>th</sup> 1967

To Haverdony area

With J. Newton Thomas &  
Harry Kerkum at J.N.T.'s  
invitation.A Snipe shooting  
trip for J.N.T. - collecting  
trip for me.

To E. Malheur 3:45

Transferred to Newton's  
car. Haverdony  
collected H. Kerkum  
ca 4:15.To Shihab's paddock  
Haverdony area  
Up to 50 Snipe  
in first paddockW 7576 Endenaga hudsoni  
Cru 17 mi.ca 38 or 30-35  
miles

Some 15 birds shot by  
I.N.T. & H.K.

4 well specimens,  
donated to the Museum  
Collections

Swampy field; — old  
stream first (Quailman  
Creek?) have grass  
swampy patches

Bell pattern marks —  
more also white

Speckles patchings  
Did not hear much  
noise

Am seeing some  
were keeping low  
over grass.

Went also to Sandypt  
- Chantrelle creek  
Bracken, woodland & sand  
- 1 - 2 here near  
swampy patches.  
Returned to Chalo  
7-30 Thence Blackburn

46. Spallina cyaneola

2 pairs seen. - one at the top of the hill  
over the cemetery, another pair near the  
house stables - joined

1 pair of Spallina cyaneola cyaneola  
singing together in the evening call.  
Singing together in the evening call.  
Singing together in the evening call.

♂ singing, very high pitched squeak sound

♂ singing off calling. 1 calling. 1 following some  
time later  
given calling. C. melloni call

♂ singing around house looking  
over "lawn"

2 Rosellas flew over calling  
loudly.

Over over for birds.

Red Wattlebird (A. ~~canadensis~~)  
disputing with a Kestrel (Cyanocitta  
stelleri) a later live humming  
a "crow". (Near tennis court at  
"Rumba")

♀ Blackbird (Turdus ~~mus~~), carrying  
grass, nesting material seen in  
watts road.

Sw. Hummer - 1 seen at NW 27 yrs  
ago but back again. 1 older Sw. Hum.

Didn't seem terribly interested but  
enjoyed looking at longmouths.  
...and he never realized there were  
so many different birds in his  
garden. His son-in-law is the  
barber (Mr Harvey Barnett).

Departed at 4:15 pm.

Back near Toorak  
 now.

Swampy, bracken woodland  
 Habitat - then low slender  
 dwarf scrub & mangroves  
 1200-1300 South Tooten  
 Hotel \*

Today was towards Warrnet  
 Urban

13:20 Turning down left to Box 6  
 & Warrnet, then turning left  
 to Warrnet. Still prominent grass-  
 land, clumps of shrubby woodland,  
 woodland scrub & woodland

Kepler Blume? R.T. - down to  
 "area of Environmental ~~Significance~~ <sup>Significance</sup>  
 Extensive mudflats and mangroves  
 Swamp. Interspersed mudflat  
 heath shrubby woodland scrub  
 mangrove scrub

Very little bird life here or  
 elsewhere this morning — the  
timber

Hirundo / Honeyeater calling  
 (Yellow-green?) Bracken  
 woodland, much open  
 farmland all very similar

Turning into Carrizosa Creek  
proceedance formation flora &  
fauna. The habitat has the  
woodland, dwarf scrub & mesquite  
scrub

Carrizosa Creek has a Preservist  
group (native).

Moving out to go south west.

Spent woodland.

1400+ Turning down Cango  
have to avoid trees

Proceeded

Hawthorn Hedge. Wiche Woodland

1, Patch of extensive woodland  
Turning to Tyab.

Kokabura 1

Turning left into Bonig down  
RS.

Bogwinthunk? having. Small  
Xanthoxanthus, Nony Myra ending  
Blue Wren ending, Sp w Plover  
ending, Yellow Robin!  
Roadster, McKurdy Rd

Turn left into Denham Rd  
Down to coast road

Lysaght property. Nice  
coastal scrub leading to  
samphire and driny scrub &  
mangrove scrub.

Blue Blain

Turn left into Denham Rd down  
to coast near Lysaght property.  
Nice coastal scrub leading to  
samphire & driny scrub &  
mangrove scrub. Blue Blain

Yellow Robin calling. There are  
still an aep. community-

"factory" in the area -

presume Lysaght industry  
(Green building). Back to main  
road - turning down to the shops.  
Now going down to Seaview  
Point.

Typical peninsular vegetation  
Patches woodland, grassland,  
scrub, wet scrub - these mainly  
private property.

Along point area timber  
limited. Beach now  
towards Tyab - Crab Point -  
rescue

# Point Cook to area

July 18th, 1980

With Newton Thomas  
to collect Seasil

1.15 Departed  
ebb stopped fine  
part clear, warmish.  
To Dunning Rd  
W. Overton Rd  
Down through  
Langdon

Landed above 150

Ken Selwyn & his

Two Labrador (crosses)

Type: 4 Honeycombs

arrived at 2:30 -  
went straight into  
property chambers  
jaws - rail horse  
bunny.

Spent till 4:30  
shooting. Shags nested  
in hives - great days  
- I think I don't  
fully plentiful.  
Newton shot

I shot 1

(4 birds left - at his  
request - for property  
owner. Beyond

on grounds museum  
owner if I was not

responsible for  
owner's illegal

possession on closed

grounds if he so wished,  
museum has right to donate them even if I  
couldn't give him the right to have them.

128

Then good L. hawk  
- am. largely so  
much and 7 ~~more~~  
more flying birds that  
I could not get out  
them quickly &  
expensively.

Dynasts 4.40 -  
Lanka over Wedgite  
Bridge SE Ferry  
~~Point~~ Richmond  
where I run  
Rd. back to  
Ebbesford at  
17.10. - ~~very~~  
good

The habitat was  
heavily grazed

postmarked  
 about several  
 times long back  
 (apparently) before  
~~was~~ . Remarkable  
~~and early~~  
~~that~~ the can I can  
 occur, without  
 the  $\frac{1}{2}$  one having  
 any awareness of  
 it.

At least four large  
 hares (Lepus europaeus) got  
 up in the paddock during  
 our day

 1981

Sunday, July 26<sup>th</sup>

To display Pherson  
 specimens about  
 40 in number

10:15 Degan Valley  
 arr. Super Sables  
 Hotel Warburton  
 11:20 Set up specimens  
 (ca 40 Pherson  
 skins) in  
 conference room

2.30 - 3.30

Brief introduction  
then displayingspecimens for  
the members

Much appreciated

To be explored:

Idea of pump  
shows ~~cooper~~  
as similar in  
arriving the  
to be discussed  
and perhaps  
~~organ~~ initiated

= Idea of selling up  
 a collection of  
 birds that show  
 what the species  
 ought to be like  
 e.g. Lady Amhurst  
 without Golden  
 Pheasant characteristics

I was also assured  
 that high level  
 discussion ~~and~~  
 concerning fifty  
 bar on import of  
 Pheasants is being  
 held & should  
 show response  
 within 2 years  
 it is assumed that

138

Now at 14.50 we  
 were at the ~~dams~~  
 dam after long  
 walk. Mike & I  
 agree that we  
 have seen remarkably  
 few birds for the  
 day & that the bird-  
 population seems  
 to have changed  
 since earlier  
 years so no  
 Hooded Merganser  
 No Speckled  
 Warblers

very little general  
 bird activity.

This morning  
 we also put up  
 a fox on Wilson  
 - mid-lake to land  
 with white bird  
 - resting on rocky  
 hillside.

1525 Do party for city

\* Isolated trees (emergents) may project from the canopy of some communities (Richards, Tansley, and Watt, *Imp. For. Inst. Pap.* No. 19, 1939, 6). In some closed-forests, emergent *Aratucaria*, *Acacia*, or *Eucalyptus* species may be so frequent that the resultant structural form may be classified better as an open forest.

† Some ecologists prefer to ignore scattered trees and shrubs, equivalent to emergents in a predominantly grassland, heath, or shrubland formation.

‡ A tree is defined as a woody plant more than 5 m tall, usually with a single stem. A shrub is a woody plant less than 8 m tall, frequently with many stems arising at or near the base (slightly modified from Beadle and Costin, *Proc. Linn. Soc. N.S.W.* 77, 1952, 61).

§ These formations are rare in Australia.

¶ Appropriate names for the community will depend on the nature of the dominant herb.

Formula	Density of Tallest Very Dense (v.d.) ( $<$ dia. canopy)	Dense (d.) ( $<$ twice dia. canopy)	Stratification Mid-dense (m.d.) ( $>$ twice dia. canopy)	Open (o.)
